

ENGINEERING COUNCIL OF INDIA (ECI)

CO-ORDINATION CENTRES

Engineering Council of India has established a **National Register of Professional Engineers** from all disciplines of Engineering Profession. Over 3000 engineers, from various disciplines, have already registered in this register, from various parts of the country.

The professional engineers, apart from having requisite educational qualifications, have to undergo minimum 50 hours of Continuous Professional Development (CPD) per year. The fulfillment of this requirement is essential and would be met through their active participation in research and development programs, specialised good quality Seminars, Workshops, Conferences and Training programs accredited by ECI.

To propagate the objectives of ECI's mission to Professionalise engineering fraternity, various "**Coordination Centres**" i.e. the regional hubs are being established in all the states in India and also abroad.

ECI is happy to announce that 7 Coordination Centres have been established. The role & activities of the Coordination Centre (CC) will be:

- ☐ To promote the registration and enlistment of engineers at all levels in the National Registration of ECI.
- ☐ To observe & ensure the ethical practices being followed by the registrants and to report matters of violations to the Board of Registration of Professional Engineers of ECI.
- ☐ To evaluate and observe the conduct of Continuous Professional Development Programs (CPDs) in their region.
