

“Expression of Interest”
Invited from Mentors for Engineering Students registered in the
National Register

Engineering Council of India (ECI) the apex Engineering Body of India, was formed in April 2002 by coming together of all 32 Engineering Associations/ Bodies of India. Its members include all major Councils & Bodies of each stream of Engineering. For details please see the www.ecindia.org.

Engineering Council of India (ECI) started the process of registration of Professional Engineers in January'2016. The registration of approx. 2000 engineers is over and around 1000 are under processing. A few dozen applications are now being received everyday.

ECI has been contacted by Canadian Immigrant Integration Program (CIIP), British Columbia, Canada for sourcing of 100 or more engineers for working in Canada. We are in touch with the apex Registration bodies of Canada to help promote this initiative further, as also to have our degrees officially recognized there.

ECI invites “Expression of Interest” from the senior member of the engineering community. As a part of our efforts to introduce professionalism, we would like the budding engineers including engineering students to see the professional path ahead, under your care.

To begin with, we would like you to take a few student members of ECI under your wing and guide & groom them in the manner you think appropriate in their preparation for the future. In case you feel it is appropriate, you could may give them some live Project work.

Request for your **“Expression of Interest”** to reach by **30th June, 2016** to the address mentioned below.

Director, Engineering Council of India
1304 (13th Floor), Hemkunt Chambers, 89, Nehru Place, New Delhi – 110019 India
