

Engineering Council of India

ECI/Conf/DT/2018

May 24, 2018

**Sub: National Conference & Exhibition on “Drone Technology” in November’2018
at New Delhi**

Dear Sir,

To begin with, may I introduce the **Engineering Council of India (ECI)** to you. ECI was established in April 2002 as the **apex body representing several Institutions and the professional bodies** representing various streams of Engineering discipline, to nurture the engineering profession. This, of course, includes promotion of futuristic technologies. Details are available at www.ecindia.org.

Drone technology is futuristic disruptive technology and is evolving very fast across the world. Initially used for child entertainment, Drones i.e. unmanned aerial vehicles (UAVs) are now finding practical and innovative civilian uses. A large number of businesses are looking forward to utilizing the capacities of these machines for various applications in many sectors of the economy.

In recent times the avenues for application and usage of Drones for civilian use have increased manifold. Heavy investments are being made in these devices for swifter and more responsive services, viz. mapping, monitoring, archeological survey, aerial photography, disaster management, rescue operations & healthcare, surveillance or for public safety and safety inspections etc.

It is important to generate widespread awareness and understanding among Central / State government departments, public sector enterprises, academicians, manufacturers, other concerned agencies as well as the emerging generations.

To promote wider awareness about UAVs and related systems, ECI jointly with its Member Associations, Construction Industry Development Council (CIDC) and International Council of Consultants (ICC) is organizing **“National Conference & Exhibition on Drone Technology” during November’2018 at New Delhi**, supported by DaaS (Drone as Service) Network Australia and ACE Aviation, Australia. The objective is to provide a forum where **international experts** in Drone technology and their industrial applications can showcase & share their knowledge and skills with the world. We are **requesting the Hon’ble Prime Minister of India to inaugurate the event.**

Engineering Council of India

We are writing this letter to invite you to participate **by nominating delegates and/ or Sponsorship and/ or as Exhibitor in this prestigious event.** I will be grateful for your confirmation at your earliest convenience. An information brochure for advance information is being enclosed along with this letter for your kind perusal. Details will follow.

We look forward to your positive response.

Thanking you

Yours truly
For Engineering Council of India

Dr. P. R. Swarup
Member Secretary
