DG, CIDC

Engineering Council of India

January 1, 2018

Subject:- Career Development with Engineering Council of India

Dear Student,

Let me at the onset, wish you and your family members a very happy and prosperous new year.

You may be aware that All India Council of Technical Education (AICTE) has made Engineering Council of India (ECI) a partner in its endeavour to make you employable for the industry, i.e. empowering you to become not only employable with industry but also seek to make you employment provider.

In line with the above, AICTE/and ECI have started the concept of ChhatraVishwakarma Awards, which seeks to create entrepreneurship in you, by making you come up with innovative ideas and designs which would help to enrich the common man's life and in turn permit you to start an industry, and become an employment provider. This has been made a yearly affair and would encompass more and more streams every year.

It is the bane of our educational systems that sufficient industrial exposure is not given to the students of our technical educational institutions. Looking at your diverse curriculum engagements, Engineering Council of India has formatted modules to enable you have at least six months of regulated and closely monitored industrial internship experience. This interalia includes a month's period which would be used to equip you with practically all skills required for you to be ready to complete your balance internship period fruitfully.

In addition to the above, niche areas such as Drone Technology, On line Dispute Redressal (ODR), Aquifer Technology, Herbal Medicine formulations and production etc are also being explored and being added to the options for a rich and rewarding careers for the technical students.

If you are desirous and would like to have a very satisfying career, then it would be in your interest to join the Engineering Council of India (ECI)'s initiatives at the earliest.

Once again with best wishes for the New Year,

Thanking You,

(Dr. P. R. Swarup)
