<b>PROGRAM</b>	<b>Construction of Civil Works</b>
<b>CATEGORY</b>	<b>Constr Engg &amp; Mgmt</b>
<b>DURATION</b>	<b>2 Days</b>
<b>OBJECTIVE</b>	<p>Performance of a construction project is measured in terms of its control on quality, time and cost. A good understanding control over each of these aspects is a key to effective construction project management.</p> <p>The Program will provide participants with the knowledge and skills to help them supervise civil works and achieve the desired quality in a systematic manner. Participants will gain practical skills and training in testing of materials, quality control, use of checklists and documentation.</p>
